

Door-in-a-box

It may seem impossible, but it's actually very simple.

A door requires hinges, a lock, and a handle. Could this be any simpler?

Yes, actually: With Troax's new door kit that is always in stock, in all sizes, so that it fits all Troax mesh panels.

All this in a box that is only a fraction of the size and weight of the complete door.

You can't expect me to believe that!

Yes, we do.

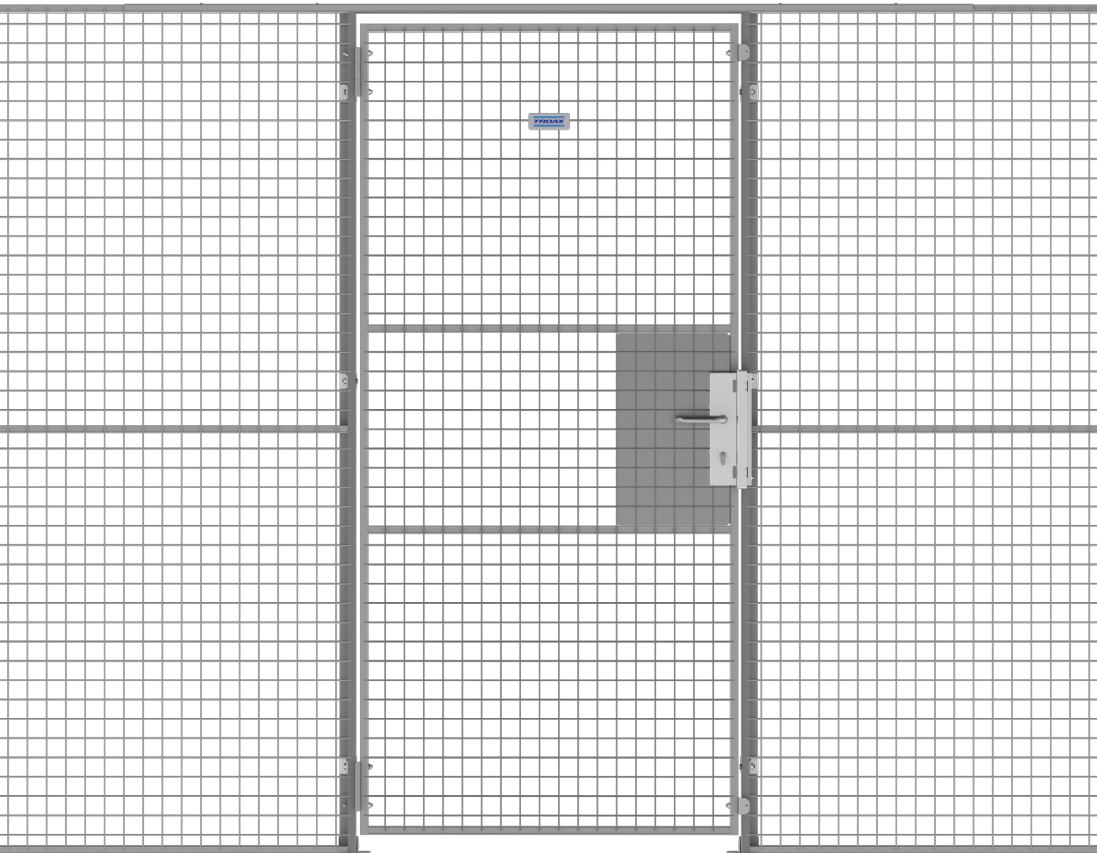

The box only contains hinges, a lock and a handle. But put them on a Troax mesh panel - whatever the size - and you instantly have a complete door.

You'll believe it when you see it.

What do you do when your Troax materials are delivered?

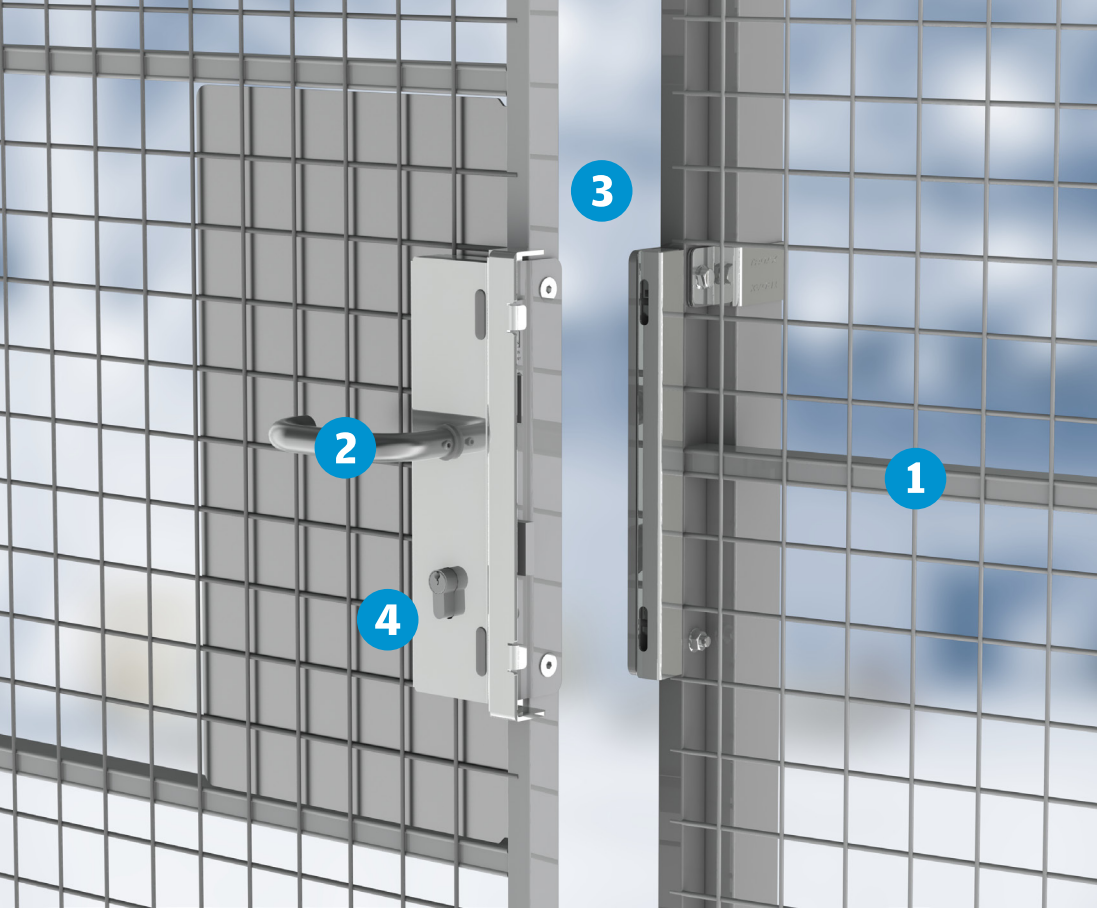

Choose your mesh door panel, open the box and fit the hinges,
the lock and the handle and you have a door - no doorframe is required!

Look again- and again!

When you have built the new Troax wall, you can choose between inward- or outward opening configuration as well as right or left hand opening.

All with the same kit, always ex-stock from our warehouse.

Get a new perspective on mesh doors.

This idea is completely scalable, so you can adapt it to your individual requirements:

- 1 Mesh panels in all sizes
- 2 Right or left hand opening
- 3 Inward- or outward opening
- 4 Padlock or cylinder lock

Unbelievable, but true!

It is now so much easier to add a door to your Troax wall system.

The doors are just as flexible and easily adjusted to your safety needs as all other products within the Troax range.

That 's safe and smart. That's TROAX.

Door-in-a-box

Seeing is believing.

Now you have 2 easy options:

- 1 Order a box and new mesh panel, or
- 2 Order just a box, and create a door from an existing Troax mesh panel
