The image shows a close-up of a metal door handle on a roll-up door. The handle is a dark, cylindrical metal piece with two circular end caps. It is mounted on a horizontal metal track. The background consists of the corrugated metal of the roll-up door, which is slightly out of focus. The lighting is dramatic, with strong highlights and deep shadows, emphasizing the metallic texture and the industrial nature of the subject.

TROAX SELF STORAGE IN STORAGE SINCE 1955

Our unique range of high gloss white hall systems in combination with nice colored doors will give your customers a good first impression, not only today but for many years ahead.

LET'S DRAW THE ROLLER WALL

No matter if you are planning for your first project or your thirtieth, you can always contact us with your inquiries. We will gladly examine your property, and provide a blueprint with full pricing – without requiring the purchase. The proposal, as well as the blueprint, will include an estimate of how much it would cost to convert your building into a self storage.

Our Sales and design team knows how to use every available space to achieve maximum lettable area (Uby), and we have full understanding of how important it is to get the right mix of unit sizes.

AVAILABLE ALL OVER EUROPE

- » The roll-up door and the partitioning walls are made of corrugated sheet metal. Swing doors and hallway walls are made out of flat thick sheet metal.
- » White gloss paint is the standard, but other colours are available, of course.
