

## Knob & Handle

Use the cylinder lock with knob and handle to ensure a locked door from the outside, opened by a key, with a handle on the inside for panic escape. The lock is available in two versions, both equipped with a SAG lock case where Kit 5800 is without deadbolt, and Kit 5810 has a deadbolt anti-panic, meaning that the door is possible to open from the inside even when it's locked with the deadbolt.

The locking tube as well as the striking plate, are reinforced with a welded steel cover to reduce the risk for manipulation. Extra hooks makes it impossible to open the door by pulling it sidwise. Choose one of our profile cylinders, or contact your local locksmith for easy maintenance solutions.

## FACTS

### Dimensions (approx.)

#### W x H x D

70 mm x 290 mm x 30 mm

The Cylinder Lock can be supplied pre-mounted on our single hinged doors, or supplied as parts in a lock kit for easily mounting on site on our single or double hinged doors.
