

Smart Post with Integrated PCB

The Smart Post is our 60x40x2200 mm standard post prepared for buttons and cable wiring inside.

Together with the new bracket "Buttons with integrated PCB" you can complete your Safe Lock and Safe Escape Lock installation with start/stop buttons that are easy and quick to install. Choose among 5 colour tabs to personallize your button set-up for 3 buttons and the top button is an Emergency Stop.

There is also an option with an empty bracket prepared for buttons, where you can mount and wire your own selection of buttons.
