

Speed Bolt

The Speed Bolt is a perfect fastener for our Musca Brackets, especially when you require a **Fast** and **Safe** assembly. It's only one item which you mount from the front and you don't need to reach around the back side of the upright.

And when an Anti collapse screen is to be mounted to a pallet raket with closed uprights, the Speed bolt is **Flexible** so you don't need to bolt through the whole upright.

The Speed bolt is also **Strong**; it's tested for 2500 Joules.

FACTS

The contents in each kit, No. 35700329

Quantity	Description
20	Musca Speed Bolt M6x32
20	Nut M6 M6MF Tensiloc
