

## Self Storage wall system

Troax self storage hallway system are built from partition panels made from high glossy white with corrugated appearance as standard. The coating provides a bright and clean finish, with superior durability.

Partitioning and corridor systems are extremely versatile and can be adapted to fit almost any space, the standard white color gives a bright and clean appearance. Kickplate as in picture can be added as an option.

Dividing walls supported with a midspan for extra stability comes in a galvalume finish.

### FACTS

#### Hallway wall system

Max Height (mm)	Thickness (mm)
3000	0,4

The 51mm wide, corrugated panels lock together tightly at the side seams without the use of exposed fasteners. The system provides an economical and attractive divider partition.

#### Unit partition wall system

Max Height (mm)	Thickness (mm)
3000	0,4

The partition is a non-load bearing interior unit divider. It provides for an economical and attractive interior partition wall system. The 51mm wide sections lock together tightly at the side seams without the use of exposed fasteners. Mid-span horizontal bracing provides support for greater wall strength.
