

A robust and durable machine guard

Strong Fix is a robust and durable machine guard based on heavier 80x80 posts together with a strong bracket. This system is the best alternative for harsh environments or when there is a high risk for impacts. Together with our ST30 mesh panels, it's tested to withstand an impact of 2000 joules.

The adjustment bolts for the posts help to compensate for uneven floors and with the bracket you can easily adjust the panels on the post. Choose among the same door solutions as for our other systems.

Strong Fix system meets the requirements of the Machinery Directive as the components are held captive in the guard even when the system is disassembled.

FACTS

System Posts

Post 80x80 x 3 mm

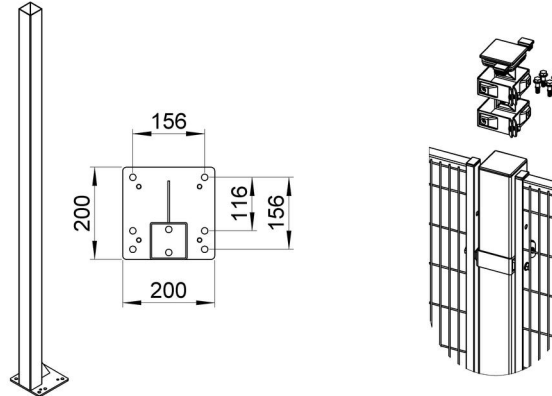

2200 mm height
3000 mm height

Standard colour is grey RAL7037. Any colour of your choice can be offered.
