 **60 YEARS**

THE
ORIGINAL

—
SAFETY BY TROAX

MADE OF 100 % STEEL WITH 100 % DEDICATION

We manufacture steel mesh panel solutions as well as an extensive range of accessories. Together they form tailored solutions for companies all over the world.

The mesh panels are made of 100% high-quality steel. The manufacturing process ensures a consistently high quality and the majority of the assortment is standard

products. The products are manufactured in our factories in Hillerstorp, Sweden; Calco, Italy; Chicago, USA; Kingswinford, England and Shanghai, China. In order to optimize and develop the assortment, our production department works closely with other departments within the company.

WE PUT OUR TEST TO THE ULTIMATE TEST

WE ARE THE FIRST MESH PANEL SOLUTION COMPANY IN THE WORLD TO HAVE OUR TEST METHOD CERTIFIED. THIS MEANS WE CAN GUARANTEE THAT OUR TEST METHOD PROMISES WHAT WE SAY IT PROMISES; THAT YOU ARE SAFE.

Troax Test Center is the heart of our business. Here our products go through tough tests to maintain a high standard. It's not an easy job; it takes a lot of time, effort, and fighting spirit, but it's always worth it, because our aim is to keep you safe.

When it comes to security, we like to play it safe. We never take chances, shortcuts, or gamble. That's why we perform impact tests on our product systems including panels, brackets, retainers, and anti-collapse systems in our Test

Center. The results are good; they often exceed standards and directives for various markets.

TESTED BY TÜV RHEINLAND

We use the organisation TÜV Rheinland to certify our test methods. TÜV Rheinland is short for Technischer Überwachungsverein, which means Technical Inspection Association. The organisation consists of independent consultants who validate the safety of products and services of all kinds in order to protect humans and the environment against hazards. Because TÜV Rheinland has very strict requirements for the approval of a product or service, the certification is one of the strongest quality marks internationally.

OUR LINE IS TOP OF THE LINE

It's one thing to be a world leader, it's another to develop products that are world leading. That's why we are pleased to have the world's largest and most efficient production line. Thanks to the size and the plan arrangement, the production line helps us develop innovative, powerful, and strong steel mesh panel solutions.

A brand new paint line, which increases flexibility and quality, was launched in 2016. Although the old paint line has long been completely free from solvents, the new one makes us better equipped to meet future environmental requirements.

SHOW YOUR TRUE COLOURS

What do you prefer? Baby blue, lemon, or jungle green? Our mesh panels and systems are available in any colour you like, although grey is the preferred colour because it's easy to see through.

When it comes to colours the rules and safety requirements are becoming more stringent by the day. Nowadays the colour of mesh panels surrounding a robot or machine must allow good supervision. This is why most customers choose our standard colour grey, as it is the easiest to see through.

PEOPLE PROTECTING PEOPLE

There is a high level of knowledge and capacity among our many hundreds of employees throughout the world. We want to make a difference and take responsibility. Therefore, we act with ethics, integrity, and professionalism in everything we do. We also strive to cooperate and work closely with everyone. Our passion and knowledge is a great foundation for good results.

IT'S ALL ABOUT THE PEOPLE

For us, it's also important to cooperate and work closely with both current and future customers as well as suppliers. We are committed to put you first and offer mesh panel solutions of the highest quality. Because at Troax, it's all about the people. But there is no universal mesh panel solution; every company needs their own special solution. We are eager to find yours.

THREE IS OUR MAGIC NUMBER

Our systems are divided in the three business areas Machine guarding, Warehouse partitioning and Property protection. This offer a good foundation for focusing on the requirements and technical aspects within each area.

MACHINE GUARDING

People and processes are safe when only authorised personnel have access to the machines. Our mesh panel solutions for machine guarding provide maximum personal and machine safety in accordance with the Machinery Directive.

WAREHOUSE PARTITIONING

Have you noticed if the view through the mesh panels can prevent accidents? Or if the sprinkler system can put out a fire through the mesh panels? We have, and we will gladly help you find a solution for your business.

PROPERTY PROTECTION

Property owners all over the world furnish their tenant storage with our mesh panel storage system. They provide good light and ventilation in combination with high level of safety in case of fire, vandalism and burglary.

PLAYING IT SAFE WORLDWIDE

Troax was founded 1955 by four brothers in the small town of Hillerstorp, Sweden. As the years passed by, the small family business grew as a result of the brothers' good sense of development, manufacturing, and sales skills. The company has gone through great changes since 1955, but one thing has always remained the same: our aim to make your world safe.

Throughout the years, growth has always remained strong in terms of international expansion, products, and sector providing security equipment for industry, storage, and property.

Today we are represented all over the world, and we are continuously developing our operations on all continents.

A HEALTHIER WORLD – WORLDWIDE

Our mesh panel solutions are 99% recyclable, and through our extensive environmental work, we have taken large and comprehensive initiatives to minimize the impact on the environment. We are certified according to the ISO 14001 and ISO 9001 systems to reduce our impact on the environment. Efforts to save energy and reduce emissions continue. Worldwide.

MAKING YOUR WORLD SAFE
