

Kit 7890/7900 AC Electric strike

An electrical strike is a good option when you need an electrical keyless control of your door. For example together with a tag-, code- or card system.

Our electrical strike kit includes the lock, lock tube, end sheet tube, brackets for the electric strike, handle, hinges and door stops.

The door blade, cover sheet and the actual electric strike must be added separately to have a complete door.

FACTS

Door sizes

Door Height (mm)	Door Width (mm)
