

## Trim Kit reinforced profile

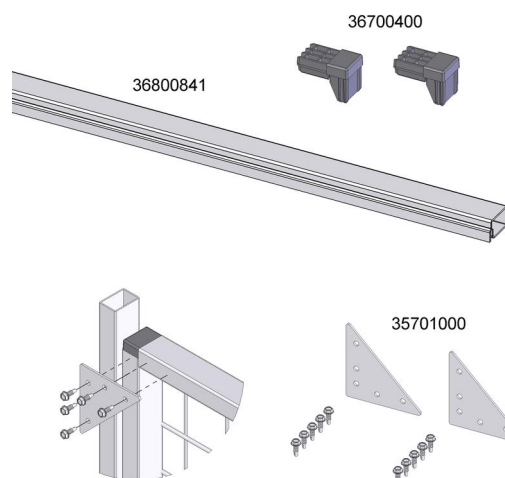

The possibility to make height adjustments on doors onsite is sometimes needed, Troax trim kit for doors allows adjustments in height on site without affecting the stability of the door structure. The Troax designed cutting profile in combination with the kit reinforcement steel plates makes the door just as strong as a welded frame. Option is for doors UR350 and UX450.

## FACTS

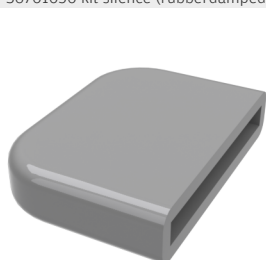

### Door components

Article	Desc.
35701000	Kit reinforced cut profile
36800841	Cutting profile UX L=1000mm
36700400	Kit cuttingcaps UX
36800841 Cutting profile is cut on site to correct length depending on doortype.
